

# GEMINI S

RGB MID-TOWER

Gemini S is an advanced gaming mid-tower case with a full-sized tempered glass cover and an integrated RGB lighting system that delivers everything a gamer needs.

## Integrated RGB Lighting

Gemini S features COUGAR's exclusive Trelux integrated lighting system. This advanced design allows it to display fourteen amazing lighting effects without installing any additional devices in the case and control them through the integrated lighting button.

Trelux can also work connected to a COUGAR Core Box v2 or to a compatible motherboards' 5V connection for system-wide lighting synchronization.

## Full Side Visibility

To help you appreciate your system's full beauty, a full-sized tempered glass side window will allow you to contemplate your system's interior.

## Elegant Design

Gemini S' brushed metal-like front panel gives it a unique look that sets it apart from other compact cases. This texture is also a great companion to the integrated lighting since the powerful lights coming out of it benefit from the reflective surroundings that help reinforce the effects.

## Great Support for Components

You won't believe how powerful a gaming beast you can build inside Gemini S. Its advanced support for graphics cards (up to three 410mm-long graphics cards) will allow you to enjoy the latest games with smooth framerates.

## RGB MID-TOWER

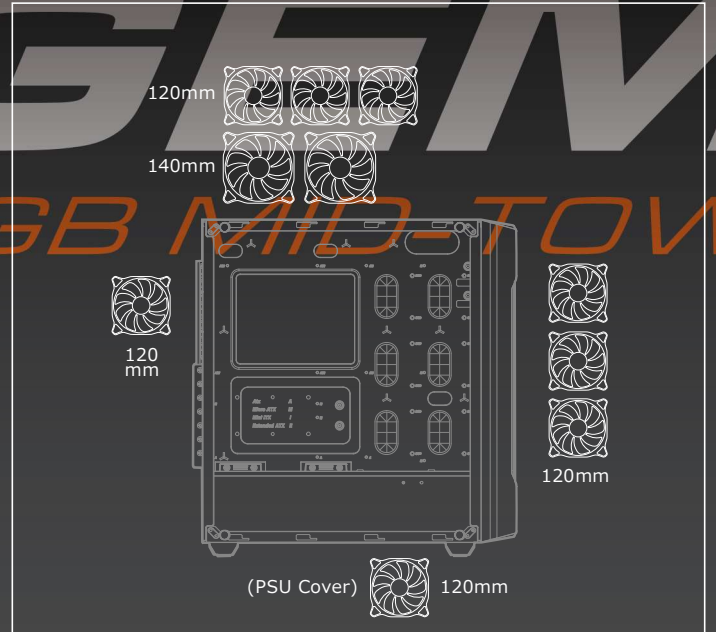

### Top-notch Cooling

Gemini S' compact layout allows you to install eight fans and three water cooling radiators, with the front and top ones up to 360mm. This immense cooling potential will enable you to choose freely the components you want in your build.

#### Water cooling radiator support

#### Air cooling support

### Incredible Storage

Up to two 3.5" HDDs and five 2.5" SSDs or seven 2.5" SSDs will provide you with all the storage you need to install games and store all kinds of media.

There are two SSD trays in this case. Please select two locations you prefer to install.
